SUMMARY

I am a multidisciplinary enterprise IT engineer with over 10+ years of professional hands on software development, engineering, architecture, and operations experience.

My passions include creating web services that are scalable, repeatable, reliable and cost efficient on the AWS platform. The leadership principle I embody most is customer obsession. I absolutely love forging relationships with engineers and leadership, helping drive innovation and influencing modernization into customer workloads. I have a proven track record of enabling enterprises during large scale, business critical migrations into the AWS cloud as well as driving features on various AWS service teams' roadmaps.

SKILLS & PROFICIENCIES

Productive - AWS, IaC, REST APIs, JS/TypeScript, NodeJS, Python, PHP, SQL, Linux, Windows, k8s, Docker, Observability tooling, DevOps tooling/processes (CI/CD Systems, Agile, Git, etc.)

Familiar - Java, C#, In-memory Database, NoSQL, Big Data

EDUCATION

Bachelor of Science - Management Information Systems 2009 - 2012
California State University, Chico

Associate of Arts - Social Science 2007 - 2009
Cerro Coso Community College

EXPERIENCE

Sr. Technical Account Manager 2019 - Current
Amazon Web Services (AWS)
San Diego, CA

- Guiding and influencing executives, technical leaders and cloud engineering in accelerating their deployment of business critical production workloads into AWS
- Works with lead architects and executives of enterprise organizations in modernizing workloads as well as optimizing with respect towards Well-Architected Framework best practices
- Helping enterprise customers during AWS Large Scale Events to ensure rapid recovery of workloads by providing guidance as well as escalation to key AWS service team contacts
- Educate customers on the need of observability by helping run workshops for tools such as CloudWatch as well as becoming an aspiring SME for AWS Builder Experience (CDK emphasis)

Matt Hopkins

Sr. Technical Account Manager
AWS

SOCIALS

mathopk

moebaca

PRIMARY LANGUAGES

JavaScript / TypeScript (Node.js)

PHP (Laravel)

SQL (MySQL)

CERTIFICATIONS

CompTIA Security+ SY0-601

AWS Certified Solutions Architect – Professional

AWS Certified Security – Specialty

AWS Certified Developer - Associate

AWS Certified SysOps Administrator - Associate

AWS Certified Solutions Architect - Associate

INTERESTS

Serverless

Containerization

Web APIs

Infrastructure as Code

Full Stack Developer 2016 - 2019

SAIC

San Diego, CA

- Wrote and maintained various web applications used internally for RMA, parts tracking, customer support tickets, CRM and more leveraging Laravel (PHP 7), JavaScript (Vue.js), MySQL and Nginx
- Maintained and enhanced a Java application that created and tracked JRE product licenses
- Created and maintained build and deployment pipelines for core JRE product
- Obtained a United States Security Clearance

Software Engineer 2014 - 2016

THALES RAYTHEON Systems

Fullerton, CA

- Red Hat Enterprise Linux SME (Subject Matter Expert) who developed, integrated and deployed heterogeneous C4ISR software environments (Red Hat Enterprise Linux and Microsoft Windows Server) for Japanese and Saudi Arabian programs
- Performed overseas system integration activities in the Kingdom of Saudi Arabia while automating infrastructure provisioning with Red Hat Enterprise Linux Kickstart, Windows Deployment Services, VMware vSphere orchestration, Javascript, Bash, PowerShell and Ruby scripts
- Saw features all the way through the software development life cycle while adhering to software engineering best practices which include, but are not limited to, leveraging software version control, peer review, agile methodologies (scrum) and other software engineering processes
- Earned an achievement award for leading a SLUC (System Level Use Case) and completing it more than 200 hours under budget

Senior Service Center Analyst / Field Engineer 2012 - 2013

Foster Farms

Livingston, CA / Farmerville, LA

- Provided support in the Service Center including desktop support, creating/updating SOP's, improving SharePoint, OS deployments, hardware maintenance/upgrades/refreshes, escalating issues and project go-lives
- Received promotion as a remote engineer after two months and immediately moved to Louisiana to support and be the face of IT as the only IT employee for the entirety of Foster Farm's Southern region – Including plants, feed mills and hatcheries within Arkansas, Louisiana, and Alabama
- Responsibilities included complete support for desktops, laptops, printers, email, scan guns, telecom equipment, servers, network equipment, DVR's, cameras, mobile phones, cabling and software deployments
- Added to the infrastructure team and performed SysAdmin related tasks including server health checks (Win2k3, Win2k8 SP2, Win2k8 R2), trending, server installs/upgrades/ decommissions

Help Desk Analyst 2008 - 2009

Ridgecrest Regional Hospital

Ridgecrest, CA

- Assisted in the daily operations of the Information Systems department working both independently and in cohesive teams
- Took on several large projects including the installation of roughly 30 wireless access points, hard wiring a newly constructed building with category 6 cables, and the installation of server hardware and software
- Provided an additional communication channel between the IS manager and other department staff working closely with the CIO

PROJECTS

Stephen Krawczyk's Biographical Website (AWS CDK)

I built out a biographical website for my Grandpa's 100th birthday. It was originally deployed back in 2019 with Laravel (PHP 7) onto Heroku. I have recently repackaged it to reliably deploy on AWS using the AWS Cloud Development Kit (AWS CDK).

The site now costs pennies a month to run as it is hosted entirely serverless leveraging AWS free tier and is replicated worldwide via CloudFront's globally distributed edge networks. The contact form logic takes advantaged of Lambda&Edge providing serverless business logic to send contact notifications to an email address via SNS.

StephenKrawczyk.com

Matt Hopkins Resume (AWS CDK)

I've also built out this resume to deploy on CloudFront using the AWS CDK much like sk-site-s3-cdk. The site is hosted entirely serverless leveraging AWS free tier and is replicated worldwide via CloudFront's globally distributed edge networks.
